Predictive Services Discussion: An upper low will move through Washington and push a cold front into the Pacific Northwest. Windy conditions are forecast near and east of the Cascades in Washington and Oregon but will be moderated by cooler temperatures and higher relative humidity. Dry and windy conditions are likely across much of the northern and eastern Great Basin into Wyoming with the greatest threat of critical conditions near and east of the Continental Divide in Montana. Dry and breezy conditions are also likely in the Four Corners area but will be mitigated by the strong start to the monsoon. Showers will spread west of the Cascades in Washington and northwest Oregon with scattered showers and isolated thunderstorms in northern Washington east of the Cascades. Isolated mixed wet and dry thunderstorms are possible over southeast Arizona and southern New Mexico. Severe thunderstorms are forecast for the northern Plains into the Midwest and western Great Lakes and may stretch southward across the central Plains.

Terrain and Fuels Make Escape to Safety Zones Difficult

Operational Engagement Category

When fighting wildland fires, it is often easy to get committed to areas that put you in Watch Out Situation #17. As firefighters progress along the fireline, it is imperative to constantly keep the following considerations in mind:

- Retreat times should be based on the slowest member of the crew.
 - Does the crew's condition allow for fast travel?
 - Discuss physical and mental conditions that could interfere with a crew's ability to travel quickly.
- Will you get adequate warning to make it to your safety zone? Who will you rely on to warn you? How will you ensure that everyone gets the word?
- Can escape routes be improved to make travel to safety zones faster? Are escape routes marked?
 - Review what you have done on past fires to locate, mark, and improve escape routes.
- Will posting more lookouts give adequate warning? Talk about situations where there was more than one firefighter assigned to be a lookout.
- To reduce the risks, consider other tactics that will allow you to be in a safer location. Review fires where you have had to change tactics because escape to safety zones was not adequate.
